Sitespeed.io

- Created in 2012 as an open-source project
- Easy to configure and run
- Capabilities continue to evolve/improve with 700+ developers
- Full integration with tools such as WPT, CrUX, PSI, Lighthouse, S3, GCS, Graphite, InfluxDB
- Well documented and great support (Github, Slack, Facebook, Twitter)
- All test results saved in a time-series database
- Extensive scripting support for multi-page journeys
- SPA support
- The list goes on ...

Use Cases

- Single source of data for TBAs, web site analysis, general research, etc.
- Collect data for competitive benchmark studies
- Single pane of glass for all vital metrics
 - Domain and Page Metrics
 - Site Construction
 - 1st & 3rd Party Information
 - Largest JS, CSS, and Images
 - Slowest First and Third-Party Resources
 - Prescriptive Guidance
 - Core Web Vitals
 - Waterfall
 - Filmstrip
 - Video
 - Google Lighthouse
 - Chrome User Experience (CrUX)

Site Analysis Portal

Continuous Testing

- Single Domain and Competitive Analysis testing is driven by Sitespeed.io
- Tests are performed on a LAN and an emulated mobile connection
- The number of unique tests and the number of URLs tested in parallel depends on the number of other tests running on the system

Data Flow
